FTMO - FIRE TEAM MEMBER OIL & GAS

The purpose of ERGT Australia's Fire Team Member Oil & Gas course is to provide the skills and knowledge required to operate a breathing apparatus whilst undertaking fire control and emergency rescue in resource industry workplaces. The course delivers skills and knowledge regarding the operation and maintenance of a breathing apparatus and equipment in an irrespirable atmosphere, as defined by the Australian Standard AS/NZS 1715:2009 Selection and the use and maintenance of respiratory protective equipment. This course also covers the skills and knowledge required to function as a member of an emergency response team in order to respond to fire emergencies in onshore and/or offshore facilities.

This course applies to operators in the resource industry who, as a normal part of their duties, are required to work with team members in response to a fire emergency, select and use emergency equipment, and conduct search and rescue according to procedures.

Locations	Perth, Darwin & Melbourne
Duration	3 Days
Outcomes	Statements of Attainment in:
<i>Please see</i>	MSMWHS216 Operate breathing apparatus
<i>Certifications</i>	PMAWHS213 Undertake fire control and emergency rescue
<i>section for detail</i>	

Authority / Regulator

The Australian Skills Quality Authority (ASQA) is the national regulator for Nationally Recognised Training delivered by Australia's vocational education and training sector.

Learning Outcomes

The expected learning outcomes for these Nationally Recognised Training Units are:

MSMWS216 Operate breathing apparatus

- Conduct pre-donning checks and tests on breathing apparatus
- Operate breathing apparatus
- Conclude operations in accordance with procedures

PMAWS213 Undertake fire control and emergency rescue

- Respond to identified fire emergencies
- Deploy fire emergency equipment
- Undertake search and rescue of affected areas

ERGT Recommended Skills & Knowledge

This course is designed for individuals that are in fulltime or part time employment, are members of an existing emergency response team and therefore have the following skills and knowledge:

- Company induction training
- Workplace emergency response procedures (including extinguishers)
- Site emergency response structure and mustering procedures
- Organisational hazard identification and the reporting of hazards
- Risk assessment processes

Additional Requirements

Please read AS/NZS 1715 Appendix B: Facial Seal of Respirators. You will not be able to meet competency if you do not comply with the requirements of the standard. Please contact ERGT if you require further clarification.

Structure & Assessment

This course is delivered through training room presentations, group discussion and practical demonstrations and exercises including responding to a range of minor and major fire incidents. Trainees will demonstrate their competence through written and practical assessment.

Certification

Upon successful completion trainees will be issued with Statements of Attainment in:

MSMWS216 Operate breathing apparatus

PMAWS213 Undertake fire control and emergency rescue

Skills Maintenance

In alignment with industry expectations and to ensure ongoing competence and capability ERGT recommends skills maintenance be conducted every 2 years.
