

# SECTION B Digital Delivery of T-BOSIET

## B.1 Target Group for the Digital Delivery of T-BOSIET

This training programme is designed to meet the initial offshore safety and emergency response training requirements for personnel new (or returning) to the offshore oil and gas industry who choose to complete the underpinning knowledge of the T-BOSIET programme via the T-BOSIET on-line programme prior to attending an OPITO approved training centre to be formally assessed against all learning outcomes.

## B.2 Delegate pre-requisites for the Digital Delivery of T-BOSIET

Delegates must complete all online elements contained in the T-BOSIET on line programme prior to attending an OPITO-approved training centre to be formally assessed against all learning outcomes.

#### B.3 Physical and stressful demands of the Digital Delivery of T-BOSIET

The physical and stressful demands of the Digital Delivery of T-BOSIET are identical to those contained in the T-BOSIET Standard. These are contained in Section A.3 of the T-BOSIET Standard.

#### B.4 Aim and objectives of the Digital Delivery of T-BOSIET

The aim and objectives of the Digital Delivery of T-BOSIET are identical to those contained in the T-BOSIET Standard. These are contained in Section A.4 of the T-BOSIET Standard.

#### B.5 Learning outcomes of the Digital Delivery of T-BOSIET

The Learning Outcomes of the Digital Delivery of T-BOSIET are identical to those contained in the T-BOSIET Standard. These are contained in Section A.5 of the T-BOSIET Standard.

Delegates will complete the underpinning knowledge for all learning outcomes via completion of the online T-BOSIET Programme prior to attending an OPITO-approved training centre to complete formal assessment against all learning outcomes.

## A.5 Learning Outcomes of the T- BOSIET

The learning outcomes are specified for each of the following modules; they are:

#### MODULE 1 Learning Outcomes Safety Induction

To successfully complete this module, delegates must be able to:

- (1) Identify the main offshore hazards and hazard effects/consequences; explain their associated risks, and how they are controlled.
- (2) Explain the potential environmental impact of offshore installation operations.
- (3) Identify key offshore installation safety regulations and explain the basic concept of these regulations.
- (4) Explain the principles of managing safety on offshore installations.
- (5) State the procedure for prescribed medicines offshore.
- (6) Explain the concept of alcohol and substance abuse policy.
- (7) Explain PPE requirements of working on an offshore installation.
- (8) Explain how to report incidents, accidents and near misses on an offshore installation.
- (9) Explain the role of the Offshore Medic.

#### MODULE 2 Learning Outcomes Helicopter Safety and Escape

To successfully complete this module, delegates must be able to **demonstrate**:

- (1) Donning an aviation lifejacket.
- (2) Actions to take in preparation for a helicopter ditching and an emergency landing.
- (3) Actions following a controlled emergency descent to a dry landing with evacuation via a nominated exit.
- (4) Actions following a controlled ditching on water (including operation of a push out window on instruction from aircrew) and evacuate through a nominated exit to an aviation liferaft.
- (5) Assist others where possible in carrying out **initial** actions on boarding the aviation liferaft, to include mooring lines, deploying the sea anchor, raising the canopy and raft maintenance.
- (6) Escaping through a window opening which is underwater, from a partially submerged helicopter (without operation of a push out window).
- (7) Escaping through a window opening which is underwater, from a partially submerged helicopter (including the operation of a push out window).
- (8) Escaping through a window opening which is underwater, from a capsized helicopter (without operation of a push out window).
- (9) Escaping through a window opening which is underwater, from a capsized helicopter (including the operation of a push out window)
- (10) Inflating an aviation lifejacket and deploying a spray visor in water
- (11) Boarding an aviation liferaft from water.

#### MODULE 3 Learning Outcomes Sea Survival

To successfully complete this module, delegates must be able to **demonstrate**:

- (1) Donning of a permanent buoyancy lifejacket prior to use in an emergency.
- (2) The correct actions when mustering and boarding a survival craft (<u>TEMPSC</u>) as a passenger during launching operations.
- (3) Fitting of a helicopter rescue device and correct body posture during winching.
- (4) Water entry (stepping off poolside, maximum height 1 metre) and the precautions to be taken when entering the water
- (5) Individual and group sea survival techniques, to include: swimming, getting into Heat Escape Lessening Position (HELP), wave-slap protection, towing, chain, huddle and circle.
- (6) Boarding a marine liferaft from the water.
- (7) \*Immediate first aid actions, including checking airways, breathing and industry recognised first aid practice\*\*

- \*Immediate first aid actions putting casualty in the recovery position: delegates must get instruction and demonstration **only** from instructors on putting a casualty into the recovery position but do not need to demonstrate this.
- \*\* Industry recognised first aid practice this may vary depending on first aid practice guidelines adopted in different countries/regions.

## MODULE 4 Learning Outcomes Firefighting and Self Rescue

To successfully complete this module, delegates must be able to **demonstrate**:

- (1) Correct use of hand held portable fire extinguishers and which ones to use for different classes of fires.
- (2) Self-rescue techniques with a smoke hood or partial blindfold from areas where delegate visibility is reduced.
- (3) Self-rescue techniques with a smoke hood or partial blindfold from areas where delegate visibility is completely obscured.
- (4) Small group escape techniques with a smoke hood or partial blindfold from areas where delegate visibility is completely obscured.

## A.6 Delegate Performance Assessment of the T- BOSIET

Delegates will be assessed against the learning outcomes specified in section A.5 using direct observation and oral and/or written questions as appropriate.

#### Formal evaluation of knowledge:

Delegates will be required to undertake a written test at the end of Module 1 (duration: 30 minutes) as a method of checking that they have met all the Module 1 learning outcomes. The test will be 'openbook' and questions must be clearly referenced against specific Module 1 learning outcomes and there must be a minimum of two questions per learning outcome. All learning outcomes must be achieved during the written test.

Training instructors must identify any gaps in delegate's learning and make reasonable effort to address the gaps to help delegates meet the learning outcomes.
